

## Liberty Global Enhances Customers' WiFi Experience with Next-Generation WiFi and Telephony Gateway

**Denver, Colorado** – November 5, 2015:

Liberty Global plc ("Liberty Global") (NASDAQ: LBTYA, LBTYB, LBTYK, LILA and LILAK) is introducing its next-generation WiFi and telephony gateway, which will deliver an impeccable in-home WiFi internet experience for its customers. We are deploying the gateway, which includes both a data modem and a WiFi router, on a wide scale basis across our European operations to deliver a superior in-home connectivity that is fast, reliable and seamless. The device will enable broadband download speeds of up to 1 Gbps across our existing EuroDOCSIS 3.0 platform.

Doron Hacmon, Managing Director, Products and Online Media Group, Liberty Global, said, "Our next-generation WiFi and telephony gateway enables us to maximise the impact of our high-speed fiber networks across Europe by giving our customers a better, faster and even more reliable internet experience. Our customers rightly demand seamless WiFi connectivity both in and out of the home, and we will continue to focus relentlessly on providing them with a best-in-class experience, wherever they happen to be."

The new WiFi and telephony gateway is now available to Telenet customers in Belgium and UPC customers in Romania and will be introduced by the rest of our operating companies in Europe in the coming months.

The launch of the next-generation WiFi and telephony gateway marks the first time that Liberty Global has designed a universal, locally-branded broadband product to be rolled out across its European and Latin American markets. Liberty Global has developed the device in close partnership with the manufacturers Arris and Compal. The device is powered by software developed by Celeno, which enables it to optimize the highest possible speeds over WiFi to multiple devices.

The box has been designed with ease-of-use in mind, featuring a simplified LED display and an install wizard that enables our customers to set up and customise their home WiFi service quickly and easily.

Additionally, Liberty Global continues to focus on providing its customers with the best WiFi experience out of the home. For this reason, Liberty Global has rolled out a network of six million public WiFi spots throughout its footprint in Europe and has the aim of growing this number to more than 10 million WiFi access points in 2016.

### About Liberty Global

Liberty Global is the largest international cable company with operations in 14 countries. We connect people to the digital world and enable them to discover and experience its endless possibilities. Our market-leading products are provided through next-generation networks and innovative technology platforms that connected 27 million customers subscribing to 56 million television, broadband internet and telephony services at June 30, 2015. In addition, we served five million mobile subscribers and offered WiFi service across six million access points.

Liberty Global's businesses are currently attributed to two tracking stock groups: the Liberty Global Group (NASDAQ: LBTYA, LBTYB and LBTYK), which primarily comprises our European operations, and the LiLAC Group (NASDAQ: LILA and LILAK, OTC Link: LILAB), which comprises our operations in Latin America and the Caribbean.

Liberty Global's consumer brands are Virgin Media, Ziggo, Unitymedia, Telenet, UPC, VTR and Liberty. Our operations also include Liberty Global Business Services and Liberty Global Ventures. For more information, please visit [www.libertyglobal.com](http://www.libertyglobal.com) or contact:
