

Information related to Regulation G

VM Ireland:

VM Ireland is a wholly-owned subsidiary of Liberty Global Ltd.

Adjusted EBITDA and Adjusted EBITDA less P&E Additions are non-GAAP measures as contemplated by the U.S. Securities and Exchange Commission's Regulation G. Adjusted EBITDA is the primary measure used by VM Ireland's management to evaluate its performance. Adjusted EBITDA is also a key factor that is used by VM Ireland's internal decision makers to evaluate the effectiveness of its management for purposes of annual and other incentive compensation plans. Adjusted EBITDA less P&E Additions is an additional metric used by VM Ireland's management to measure the performance of its operations after considering the level of property and equipment additions incurred during the period. Reconciliations of Adjusted EBITDA and Adjusted EBITDA less P&E Additions to the most directly comparable GAAP financial measure are presented below for the indicated periods:

- (a) VM Ireland defines Adjusted EBITDA as net earnings (loss) before net income tax benefit (expense), other non-operating income or expenses, net gains (losses) on debt extinguishment, net foreign currency transaction gains (losses), net gains (losses) on derivative instruments, net interest income (expense), depreciation and amortization, share-based compensation, related-party fees and allocations, provisions and provision releases related to significant litigation and impairment, restructuring and other operating items.
- (b) VM Ireland defines Adjusted EBITDA less P&E Additions as Adjusted EBITDA less property and equipment additions on an accrual basis. Adjusted EBITDA less P&E Additions is a meaningful measure because it provides (i) a transparent view of Adjusted EBITDA that remains after capital spend, which VM Ireland believes is important to take into account when evaluating overall performance, and (ii) a comparable view of VM Ireland's performance relative to other telecommunications companies.
