

Independent Practitioner’s Limited Assurance Report to Virgin Media Ireland Limited

Report on Virgin Media Ireland Limited’s (“Virgin Media Ireland” or “the Company”) Selected Information for the year ended 31 December 2025

Conclusion

We have performed a limited assurance engagement on whether selected information included in Liberty Global Limited’s (Virgin Media Ireland’s ultimate parent company) People Planet Progress Report 2025 (“the Report”) for the year ended 31 December 2025 has been properly prepared in accordance with Liberty Global’s Environmental Reporting Criteria 2025 as set out at <https://www.Libertyglobal.com/impact/impact-documentation/> (“the Reporting Criteria”). The information within the Report that was subject to assurance is indicated with the symbol “**” (“the Selected Information”) and is also listed in Appendix 1.

Based on the procedures performed and evidence obtained, nothing has come to our attention that causes us to believe that Selected Information for the year ended 31 December 2025 has not been properly prepared, in all material respects, in accordance with the Reporting Criteria.

Our conclusion is to be read in the context of the remainder of this report, in particular the “Inherent limitations” and “Intended use of our report” sections below.

Our conclusion on the Selected Information does not extend to other information that accompanies or contains the Selected Information and our assurance report (hereafter referred to as “Other Information”). We have not performed any procedures with respect to the Other Information as part of this engagement. We have performed a separate assurance engagement over certain other KPIs (which are marked with a symbol “Δ” within the Report) included within the Other Information and our report thereon can be found at <https://www.libertyglobal.com/impact/impact-documentation/>.

Basis for conclusion

We conducted our engagement in accordance with International Standard on Assurance Engagements (UK) 3000 Assurance Engagements Other Than Audits or Reviews of Historical Financial Information (“ISAE (UK) 3000”) issued by the Financial Reporting Council (“FRC”) and in respect of the greenhouse gas emissions information included within the Selected Information in accordance with International Standard on Assurance Engagements 3410 Assurance Engagements on Greenhouse Gas Statements (“ISAE 3410”) issued by the International Auditing and Assurance Standards Board (“IAASB”). Our responsibilities under those standards are further described in the “Our responsibilities” section of our report.

We have complied with the Institute of Chartered Accountants in England and Wales (“ICAEW”) Code of Ethics, which includes independence, and other requirements founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour, that are at least as demanding as the applicable provisions of the International Ethics Standards Board for Accountants (“IESBA”) International Code of Ethics for Professional Accountants (including International Independence Standards).

Our firm applies International Standard on Quality Management (UK) 1 Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements (“ISQM (UK) 1”), issued by the FRC, which requires the firm to design, implement and operate a system of

quality management, including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements. We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion.

Inherent limitations in preparing the Selected Information

The nature of non-financial information; the absence of a significant body of established practice on which to draw; and the methods and precision used to determine non-financial information, allow for different, but acceptable, evaluation and measurement techniques and can result in materially different measurements, affecting comparability between entities and over time.

As described on page 2 of the Reporting Criteria, the greenhouse gas (“GHG”) emissions quantification process is subject to: scientific uncertainty, which arises because of incomplete scientific knowledge about the measurement of GHGs; and estimation (or measurement) uncertainty resulting from the measurement and calculation processes used to quantify emissions within the bounds of existing scientific knowledge.

The Reporting Criteria has been developed to assist Virgin Media Ireland in preparing the Selected Information included in the Report. As a result, the Selected Information may not be suitable for another purpose.

Directors’ responsibilities

The Directors of Virgin Media Ireland are responsible for:

- designing, implementing and maintaining internal controls relevant to the preparation and presentation of the Selected Information that is free from material misstatement, whether due to fraud or error;
- selecting and developing suitable criteria for preparing the Selected Information;
- properly preparing the Selected Information in accordance with the Criteria; and
- the contents and statements contained within the Report and the Reporting Criteria that relate to Virgin Media Ireland.

Our responsibilities

We are responsible for:

- planning and performing the engagement to obtain limited assurance about whether the Selected Information is free from material misstatement whether due to fraud or error;
- forming an independent limited assurance conclusion, based on the procedures we have performed and the evidence we have obtained; and
- reporting our conclusion to Virgin Media Ireland.

Summary of the work we performed as the basis for our conclusion

We exercised professional judgment and maintained professional skepticism throughout the engagement. We planned and performed our procedures to obtain evidence about the Selected Information that is

sufficient and appropriate to obtain a meaningful level of assurance to provide a basis for our limited assurance conclusion. Planning the engagement involves assessing whether the Reporting Criteria are suitable for the purposes of our limited assurance engagement. Our selected procedures depended on our judgement, on our understanding of the Selected Information and other engagement circumstances, and our consideration of areas where material misstatements are likely to arise.

In carrying out our engagement, we performed procedures which included:

- conducting interviews with VMIE management to obtain an understanding of the control environment, processes and information systems relevant to the preparation of the Selected Information, but did not include evaluating the design of particular control activities, obtaining evidence about their implementation or testing their operating effectiveness;
- performing limited substantive testing and trend analysis over the GHG emissions in the Selected Information, including a comparison to the prior period's amounts having due regard to changes in business volume and the business portfolio;
- considering the appropriateness of the emission factors used by reference to widely recognised and established emission factors;
- mathematical calculations over amounts included in the Selected Information, and determining whether it aligns with the Reporting Criteria; and
- reading the Report with regard to the Reporting Criteria, and for consistency with our findings over the Selected Information.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

Intended use of our report

Our report has been prepared for Virgin Media Ireland solely in accordance with the terms of our engagement. We have consented to the publication of our report on Liberty Global's website at <https://www.libertyglobal.com/impact/impact-documentation/> for the purpose Virgin Media Ireland showing that it has obtained an independent assurance report in connection with the Selected Information.

Our report was designed to meet the agreed requirements of Virgin Media Ireland determined by Virgin Media Ireland's needs at the time. Our report should not therefore be regarded as suitable to be used or relied on by any party wishing to acquire rights against us other than Virgin Media Ireland for any purpose or in any context. Any party other than Virgin Media Ireland who obtains access to our report or a copy and chooses to rely on our report (or any part of it) will do so at its own risk. To the fullest extent permitted by law, KPMG LLP will accept no responsibility or liability in respect of our report to any other party.
